

**CACTUS WREN COOPERATIVE PRESCHOOL
Adult TB Verification Form**

The duties of a participating adult include direct work with groups of young children. Emotional stability and good physical health are necessary to these duties. All parents and adults participating as a Classroom Volunteer must have a TB skin test or a chest x-ray less than one year prior to the child's entry into Cactus Wren Cooperative Preschool. This can be obtained at the Cochise County Health Department, or from your personal physician, and **MUST** have an authorized signature. The TB skin test is a one-time requirement upon entering Cactus Wren.

1. Adult's Name: _____ Relationship to Child: _____
